

ASSEMBLY STEPS

1. Remove packaging from all components
2. Insert all cable grommets and feet
3. Ensure the end leg is 90° to the floor and the beam is flush. Insert one end of the telescopic beam into the end leg
4. Using a nylon mallet, knock the beam into position, ensuring the end leg tabs are fully seated into the notches on the underside of the beam
5. Secure top hats with bolts provided and tighten
6. Slide beams to approx distance required to suit top length
7. Hold trough fixing plates on inside of trough and screw in connecting bolts through slots provided and tighten them
